

DIGITAL CHANGE MADE IN GERMANY

# 5G CAMPUS IN DUBAI, HOW CAMPUS USE CASES WILL FOSTER INNOVATION

Falk Schröder, Detecon International

# 5G is a game changer and much more than "just another" mobile phone technology.

5G provides a **universal network layer!** IT, OT and TK are merged and complexity is reduced.

5G enables **digital innovation!** New fields of application are opening up.

Energy

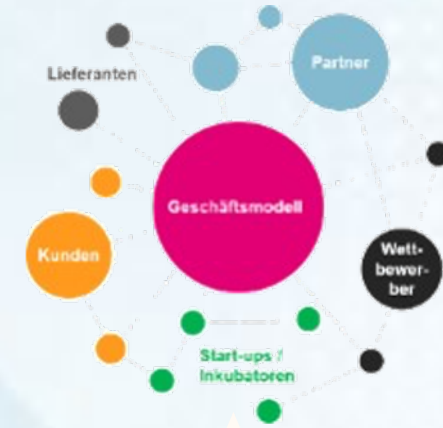

Healthcare

Logistics

Automotive

Manufacturing

Agriculture

5G changes market structures! The right partners have to be found.

5G starts today! The next steps must be planned.

# 5G provides features forming the foundation for a new generation of use cases and business models.

## Enhanced Mobile Broadband (eMBB)

### 10x LTE performance

Upload: 100 parallel 4k  
Videostreams (5 Gbps)  
Download: 1:40 min for 1 TB data  
(10 Gbps)

### Reliability at the highest level

LTE: statistical Quality-of-Service  
5G: Managed Quality-of-Service  
with dedicated resources

### 500x LTE device density

Call capacity per km<sup>2</sup>  
LTE = 2.000 devices  
5G = 1.000.000 devices

### 10x LTE performance

>10 ms roundtrip time enables e.g.:

- Cloud based AR-services
- AGV\* cloud steering

## Massive Machine Type Communications (mMTC)

## Ultra-Reliable and Low Latency Communications (URLLC)

# Industry 4.0 requires additional capabilities to enable IoT services

## Need for enhanced production processes

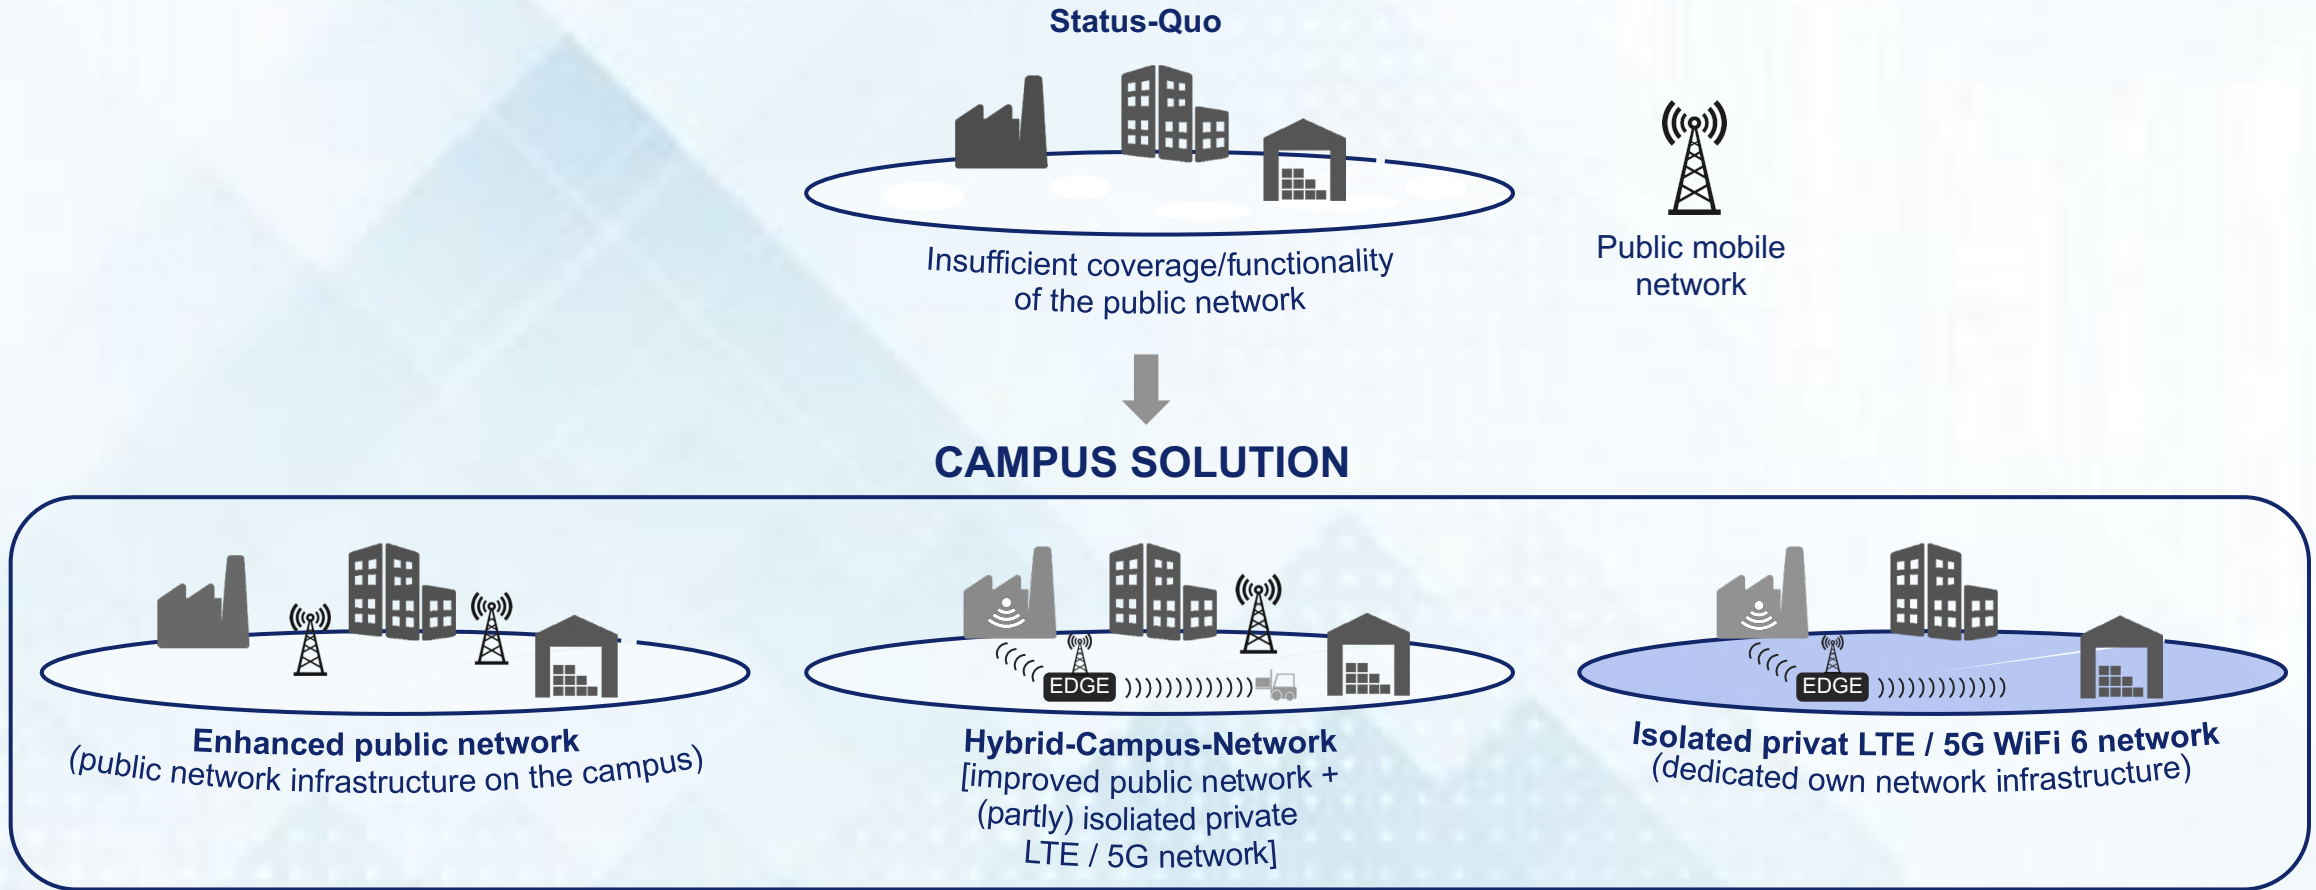

- ◆ Competition will intensify in context of globalization and digitalization towards Industry 4.0
- ◆ Need to adapt to challenging market environment
- ◆ To remain competitive, all potentials for improved productivity and process efficiency must be leveraged:
  - Need to further optimize logistics & supply chains
  - Need to enable OT / IT convergence
  - Need for agility and shorter time-to-market
  - Need for deeper insights, more information transparency of value chain

## Demand for new services

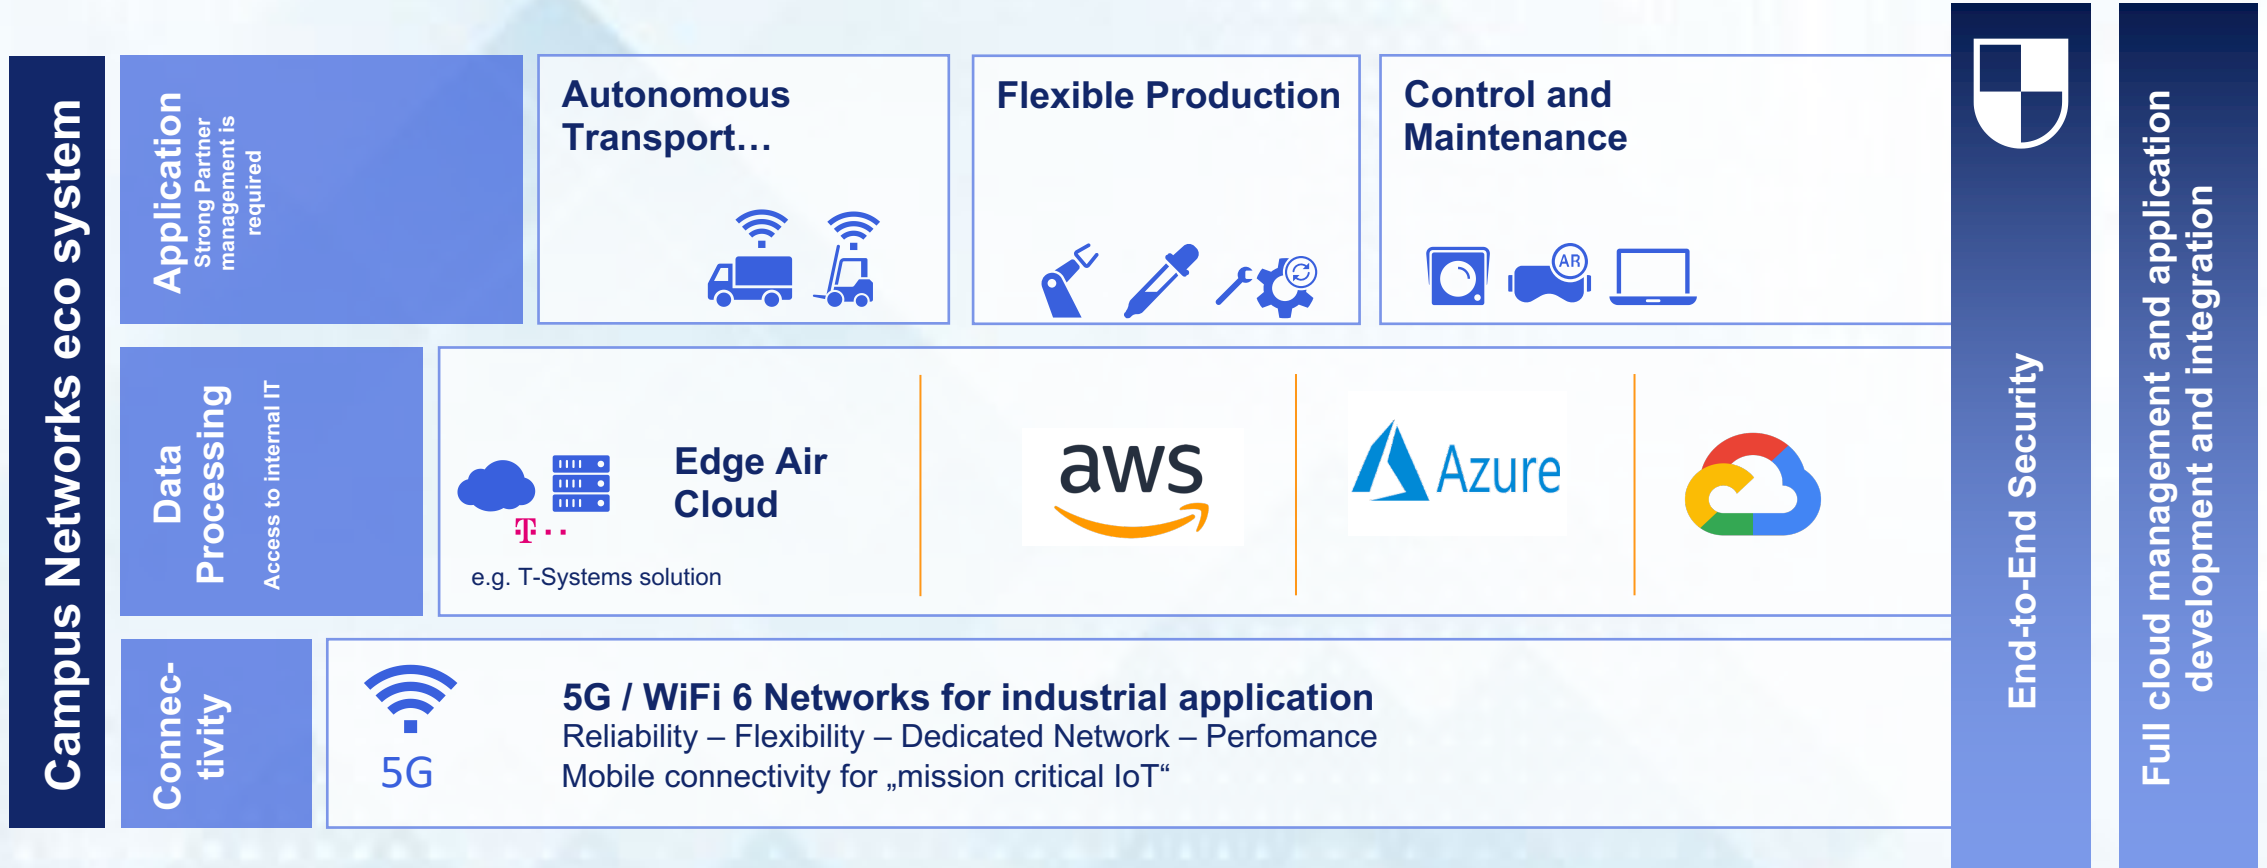

Communication / IoT Infrastructure	Factory Floor	Intralogistics	Office
 Campus-wide network availability	 Production Automation	 AGV Transport Systems	 Virtual Conferencing
 Augmented Maintenance	 Virtual Optimization	 Asset Tracking	 Wireless Office
 Safety Monitoring	 Remote Maintenance & Control	 Supply Chain Integration	

A dedicated network solution is required to enable IoT processes and new services

Depending on the individual requirements, different variants of the implementation of 5G campus networks are recommended.

# The use cases will be incorporated as applications on a cloud on premise or at the telco with full integration into campus IT via exiting connectivity
